

## Introducing EcoCarb™ Carbon Water Filtration Medias

EcoCarb™ medias are produced from the byproducts of other commonly manufactured products. All EcoCarb™ products are NSF 61 certified, AWWA B604 compliant, and offer superior performance in eliminating contaminants from drinking water. Each EcoCarb™ media is selected for your specific water quality and use case.

### KEY BENEFITS:

Tailored Products

Lower Pressure Drop

Superior Performance

## Let Us Recommend the Most Efficient Media for Your Water

### EcoCarb 1240BA and 830BA

Produced from a domestic bituminous coal source. Provides a lower pressure drop reducing energy costs.

### EcoCarb 1230C and 1240C

Produced from a renewable coconut shells, which are recovered as a byproduct of the coconut industry.

### EcoCarb 1240LDX and 830LDX

A co-product extracted during the manufacturing process of a pigment.
